***"Cooks are not found wandering in the woods. Nor do Scouts fry an egg on the first try. Guide them, teach them, but don't do everything for them."***

Ed Bailey, Denver Area Council, Centennial District

Philmont gathers people from all over. They bring knowledge and experiences from all over the world. And along the way, a few good recipes. Friends and relatives agree that you may have these secret recipes only on one condition. That you add your own and pass on the total to others.

Eat hearty and happy camping.

Review the National BSA policy on fuels and the local regulations on fires and fuels. Some Airlines have a problem with transporting empty liquid fuel stoves and fuel bottles. Liquid and gas fuels are banned from airlines. Call Ahead and plan to pick up fuel and stoves at your destination.

The recipes are listed with the title, author (if Known, so you can place blame) and the type of cooking method.

**Cooking at Altitude with attitude**

The boiling point of water decreases with increasing elevation due to decreasing air pressure. The boiling point of water decreases 1 degree C for each 1,000 feet of elevation. Cooking times increase with increasing elevation at 6,000 feet to about 125% of the time needed to cook at sea level. Time is dependent on the type of food and the method of cooking.

Altitude	Fahrenheit	Celsius
Sea Level	212	100
2,000 ft	208	98
5,000 ft	203	95
7,500 ft	198	92
10,000 ft	194	90
15,000 ft	185	85

Highly recommended reading for Parents, Leaders, and grommet Scout cooks and eaters is a good little cookbook available at most Scout shops:

**Camp Cookery for Small Groups, Arthur J. Walrath, ed., 1967, BSA**

Eating well is not just part of the fun of camping. It is important to eat well to replace the energy used in the hiking and activities that busy Scouts are prone to do. High fluid intake and high caloric intake are needed. Seasonal changes may demand over 3,000 calories per day. The food pyramid is a guide for meal planning. The Pyramid can change with camping. The high calorie diet of campers use more fats during colder weather. During Spring, Summer, and Fall try to reduce Fat in menus. Try to take the bulk of the food from the carbohydrate group.

We have tried not to duplicate the many books available on camp cooking (see additional reading list). We have tried to place our own stamp on the type of cooking, but do not limit yourself to the recipes, invent your own. The following tables are for the adventuresome who would like to try different things. Great, but try them at home first, not 20 miles out on the trail.

Take special note of any dietary needs of the Scouts and adults. Allergies to foods are common.

Don't forget the duty roster. It will save time on determination of whose turn to do what.

**Shopping Lists**

Once you have made a menu of the meals you plan to make, you need to make a shopping list. Start by listing the food items and the amount based on 1 Scout or group of Scouts. Then multiply by the number of campers. Keep Group items to a small size to reduce waste.

Here is an example of a shopping list from 1991

**Trail Meals:**

Trail foods should be quick or no-cook foods for a fast, sit and eat or eat while walking meal. Here are a couple of tables for pick and mix meals. Pick and bag for each meal or keep in a large bag for the trail. Remember that what you don't eat the first couple of days will be left for the last. If you plan for 7 days, don't eat it all the first three.

## ONE POT DINNERS

The idea is to create a stew or casserole in one pot. A mixture of starches, proteins, vegetables, and spices or a delectable sauce can become a grommet feast. The following recipes are examples. Use the Chart to help create your own specialties.

One pot dinners can be easy to prepare with a little thought before hand. Which foods need to cook longer? - Start them first. How much water is needed? - Is the pot big enough?

Try to maintain texture in the food. Mush is mush and no amount of spices will dress it up. Plastic freezer bags can serve for carrying and mixing items such as instant potatoes. Reduce the cleanup, add the boiling water to the bag and mix. This works with quick rice as well.

### Directions:

1. Select and assemble your ingredients from the grocery store, camping outlet or food co-op. Amounts of each ingredient can be adjusted to suit individual preferences and appetites.
2. Determine the order of preparation based on the cooking times of each ingredient. Items with similar cooking times and methods may be dumped together in a plastic bag. Put the bulkiest or main items in a large bag, and put the other items in smaller bags and seal them. Place these smaller bags inside the large bag and seal it.
3. Check the instructions for each component to be sure you include any extra items such as butter, dry milk, etc. that are needed.
4. Decide how much water you need to start with based on what is needed for each ingredient.
5. Write instructions for each package in the meal down, based on the items determined above. Include order of preparation, cooking times, ingredients not included in the bags, etc.
6. Include the instructions for each package with the package. Include the instructions for the whole meal with the large bag, in addition to the instructions for that bag.
7. Label each bag
  - i.e. Large bag can be labeled "dinner Day 3" with list of contents  
Orange drink, chicken soup, Mac & cheese, chocolate pudding  
Inside might include separate bags for drink, soup, and pudding. Instructions can be written on bags with a marker that will **NOT WASH** off or cut from boxes and placed in bag.

As you may tell, the above meals are a mixture of freeze dried (F.D.)and store bought foods. These are included as suggestions for the possibility of doing your own from the grocery store.

Another Grocery Item is called **TVP** for **Textured Vegetable Protein**. This Soy based product is imitation meat such as BACOS . The product can sometimes be found in the health foods or specialty sections. It can be found as “beef, ham, chicken, or bacon”. It is a lower cost substitute for Freeze dried meats. But I would always plan to add a well seasoned sauce. Or try to rehydrate in bouillon broth. Some **TVP** must be cooked, while others like BACOS are ready to eat.

**Cooking with coals..**

Coals are produced in two ways. Charcoal comes in bags not suited for backpacking but great for car camping. Place the Bag in a 5 gal. bucket to keep dry. The other method is producing coals from a wood fire. Hardwoods make better coals than softwoods such as pine. Twigs do not produce coals very well, if at all. 1 1/2 - 2 inch thick limbs make better coals. They are small enough to burn down, and large enough to make coals. The cooking can be done directly on the coals using foil

wrapped food or Dutch Oven, or use a grate over the coals. The temperature can be determined by holding the back of your hand over the coals. Allow 30-40 minutes to get the coals ready before cooking.

Approximate Temperature	Type of Fire	8" cast iron coals		12"		Seconds over fire
		Under	Top	Under	Top	
250-325 degrees	slow	2	4	3	5	6-8
325-400	Medium	3	5	4	6	4-5
400-500	Hot	4	6	5	7	2-3
> 500	Very Hot	5	7	6	8	1

All Dutch oven cooking is done by hot coals, never in a flaming fire. The coals may be from hardwoods like oak and hickory or from charcoal. Hardwoods yield long-burning coals which are necessary for the lengthy cooking process in most Dutch oven recipes. Soft woods like pine are unsatisfactory.

Charcoal is more convenient to use and is necessary in areas where there is no downed hardwood. Use a firepan under the coals to prevent killing ground cover. The pan can be metal or plywood with a thick layer of mineral soil (sand). Three or four stones can be used to prop up the pan above the ground.

The amount of charcoal needed will vary with the weather (wind and temperature)

## Camp Breads

*Bannock*

*Ancient Trailperson's Standby*

**1 cup flour**  
**1/3 tablespoon (1 teaspoon)**  
**baking powder**  
**dash salt**  
**oil or margarine**  
**water**

*At home:* package the flour, baking powder, and salt together in a large, tough plastic bag.

*In the field:* Put a little oil or margarine into the bag, and slowly add enough water to give the mixture the consistency of dough. You may have to mix it with your hands. Flatten it out into a cake, and fry it in a little oil, very slowly. Note: If you end up with a bread that has its outside a delicious, golden brown and its inside a uncooked, doughy mass, do not despair. Just pretend you're an ancient trailperson.

*Bisquick Bannock*

*Modern Trailperson's Standby*

**6-8 tablespoons water**  
**1 cup Bisquick buttermilk baking mix**  
**3 Tablespoons oil or margarine**

*At home:* Package the baking mix in a large, tough plastic bag. *In the field:* Put a 3-4 tbs. oil or margarine into the bag, and slowly add enough water to give the mixture the consistency of dough. You may have to mix it with your hands. Flatten it out into a cake, about 1/2 inch thick and fry it in a little oil, very slowly over coals or lowest possible flame. Fry it, as gently as possible, turning it often. After the bottom is browned, prop the pan up in front of the fire's flames to brown the top.

1. The batter should not be too thick - 1/2 inch is enough
2. Use straight sided fry pan, curved sides allow slips when propped before the fire.
3. Aluminum skillets get too hot too quick.
4. Don't prop up the pan until the bottom is browned.

Also try putting the dough in a zip-lock freezer bag. Place on rack in covered pot of boiling water. Let the steam 'bake' the bread. Add raisins and cinnamon, or serve with honey when done.

*Rayado Biscuits****Dutch Oven*****Biscuit Mix  
Flour**

Mix 12 - 18 oz biscuit mix as directed and pat out on a floured, flat surface. Cut biscuits with a small open end can and place 20-24 biscuits in oven. Cover and bake about 15 minutes. Can also use floured hands and balls of dough 1 1/2 ", flatten and placed in oven. Or spoon the mixed dough and drop into oven without shaping.

*Dan Beard Camp Bread****Foil***

**2 cups biscuit mix  
1/2 cup milk ( use pre-measured powder milk in a zipped bag )**

1. Stir the ingredients together; this will make a very thick dough. Add a few teaspoons of milk if necessary. Shape it like a bread loaf, and dust with additional biscuit mix or flour.
2. Grease a large sheet of foil heavily. Place the dough on the foil and wrap it loosely so the foil package will not burst when the dough rises. Wrap the dough loosely again to cover the seams and crimping
3. Place the bread package at the edge of the coals and turn every 10 minutes for about 1 1/2 hours, depending on the intensity of the heat. Yield: 1 loaf

*Cimaron Cinnamon Rolls****Dutch Oven***

**2 6-oz pkg. biscuit mix flour  
1 cup brown sugar  
3 4-oz raisins  
cinnamon**

Mix the biscuit mix as directed and pat out in a rectangular shape on a floured, flat surface. Spread raisins and brown sugar over the dough and sprinkle with cinnamon. With floured hands roll the dough into a cylinder and cut slices from the rolled cylinder. Place in bottom of Dutch oven. Cover with lid and bake about 15-20 minutes. serves 8.

**Add 1/2 cup sesame seeds, 1/3 cup walnuts and 2 cups peanuts.**  
**For the glue, use 1 cup chocolate chips, 1/3 cup honey and 1/2 cup peanut butter.**

Make sure the Scouts don't pack food in the same place as their socks and underwear. Food and patrol cooking gear go in the top of the pack, and personal gear in the bottom and the side pockets. Reserve one side pocket for trail munchies: nuts, dried fruits, smarties, hard candies and chocolate bars. Each Scout should have his own bagful of ration out to himself so that it lasts the duration of the trip. Our favorite is GORP balls; chopped dehydrated fruits and nuts "glued" together with honey, peanut butter and melted chocolate chips and rolled in icing sugar.

*Energy Balls* *The Leader, June/July 1994*

Nothing re-charges the body and encourages tired hikers faster than a quick snack on the trail. Try these "energy balls".
